The company

Special foundation and geotechnical machinery manufacturer

Dai Prà S.r.l. is an Italian company with roots in the early 20th century, initially focused on tunnels and bridge construction, has specialized over four generations into developing machinery for geotechnical works. With a team dedicated to design, engineering and manufacturing, Dai Prà leverages extensive experience and customer feedback to introduce innovative solutions aligned with the latest techniques in the sectors. Dai Prà areas of expertise include:

- Consolidation injection
- Micropiles
- Piles
- Anchoring and ties
- Rod and pipe handling
- Soil nails
- Geothermal application
- Land remediation
- Concrete spraying
- Wall injection

Our values

Committed to provide tangible results

Provide tangible value for the operators

We dedicate our efforts to the continuous improvement of Dai Prà machines, aiming to address real challenges encountered at work sites with a strong focus on:

- Enhancing ease of use durability of the machines
- Ensuring the safety of operators
- Minimizing maintenance time and costs

Co-development with the client

We understand that each project is unique, which is why engage in co-developing the ideal machinery to perfectly meet the requirements of our clients' projects including:

- Customizing mixing and injection plants with reporting system for regulatory compliance
- Selecting appropriate materials and power sources
- Developing ad-hoc solutions

Innovation and R&D

As innovators at heart, we aim to offer our clients best-in-class solutions. This commitment drives us to engage in various forward-thinking activities, including:

- University joint projects to establish cement injection standards
- Research on cement injection techniques
- Digital registration and analytics for injection data

The products and services

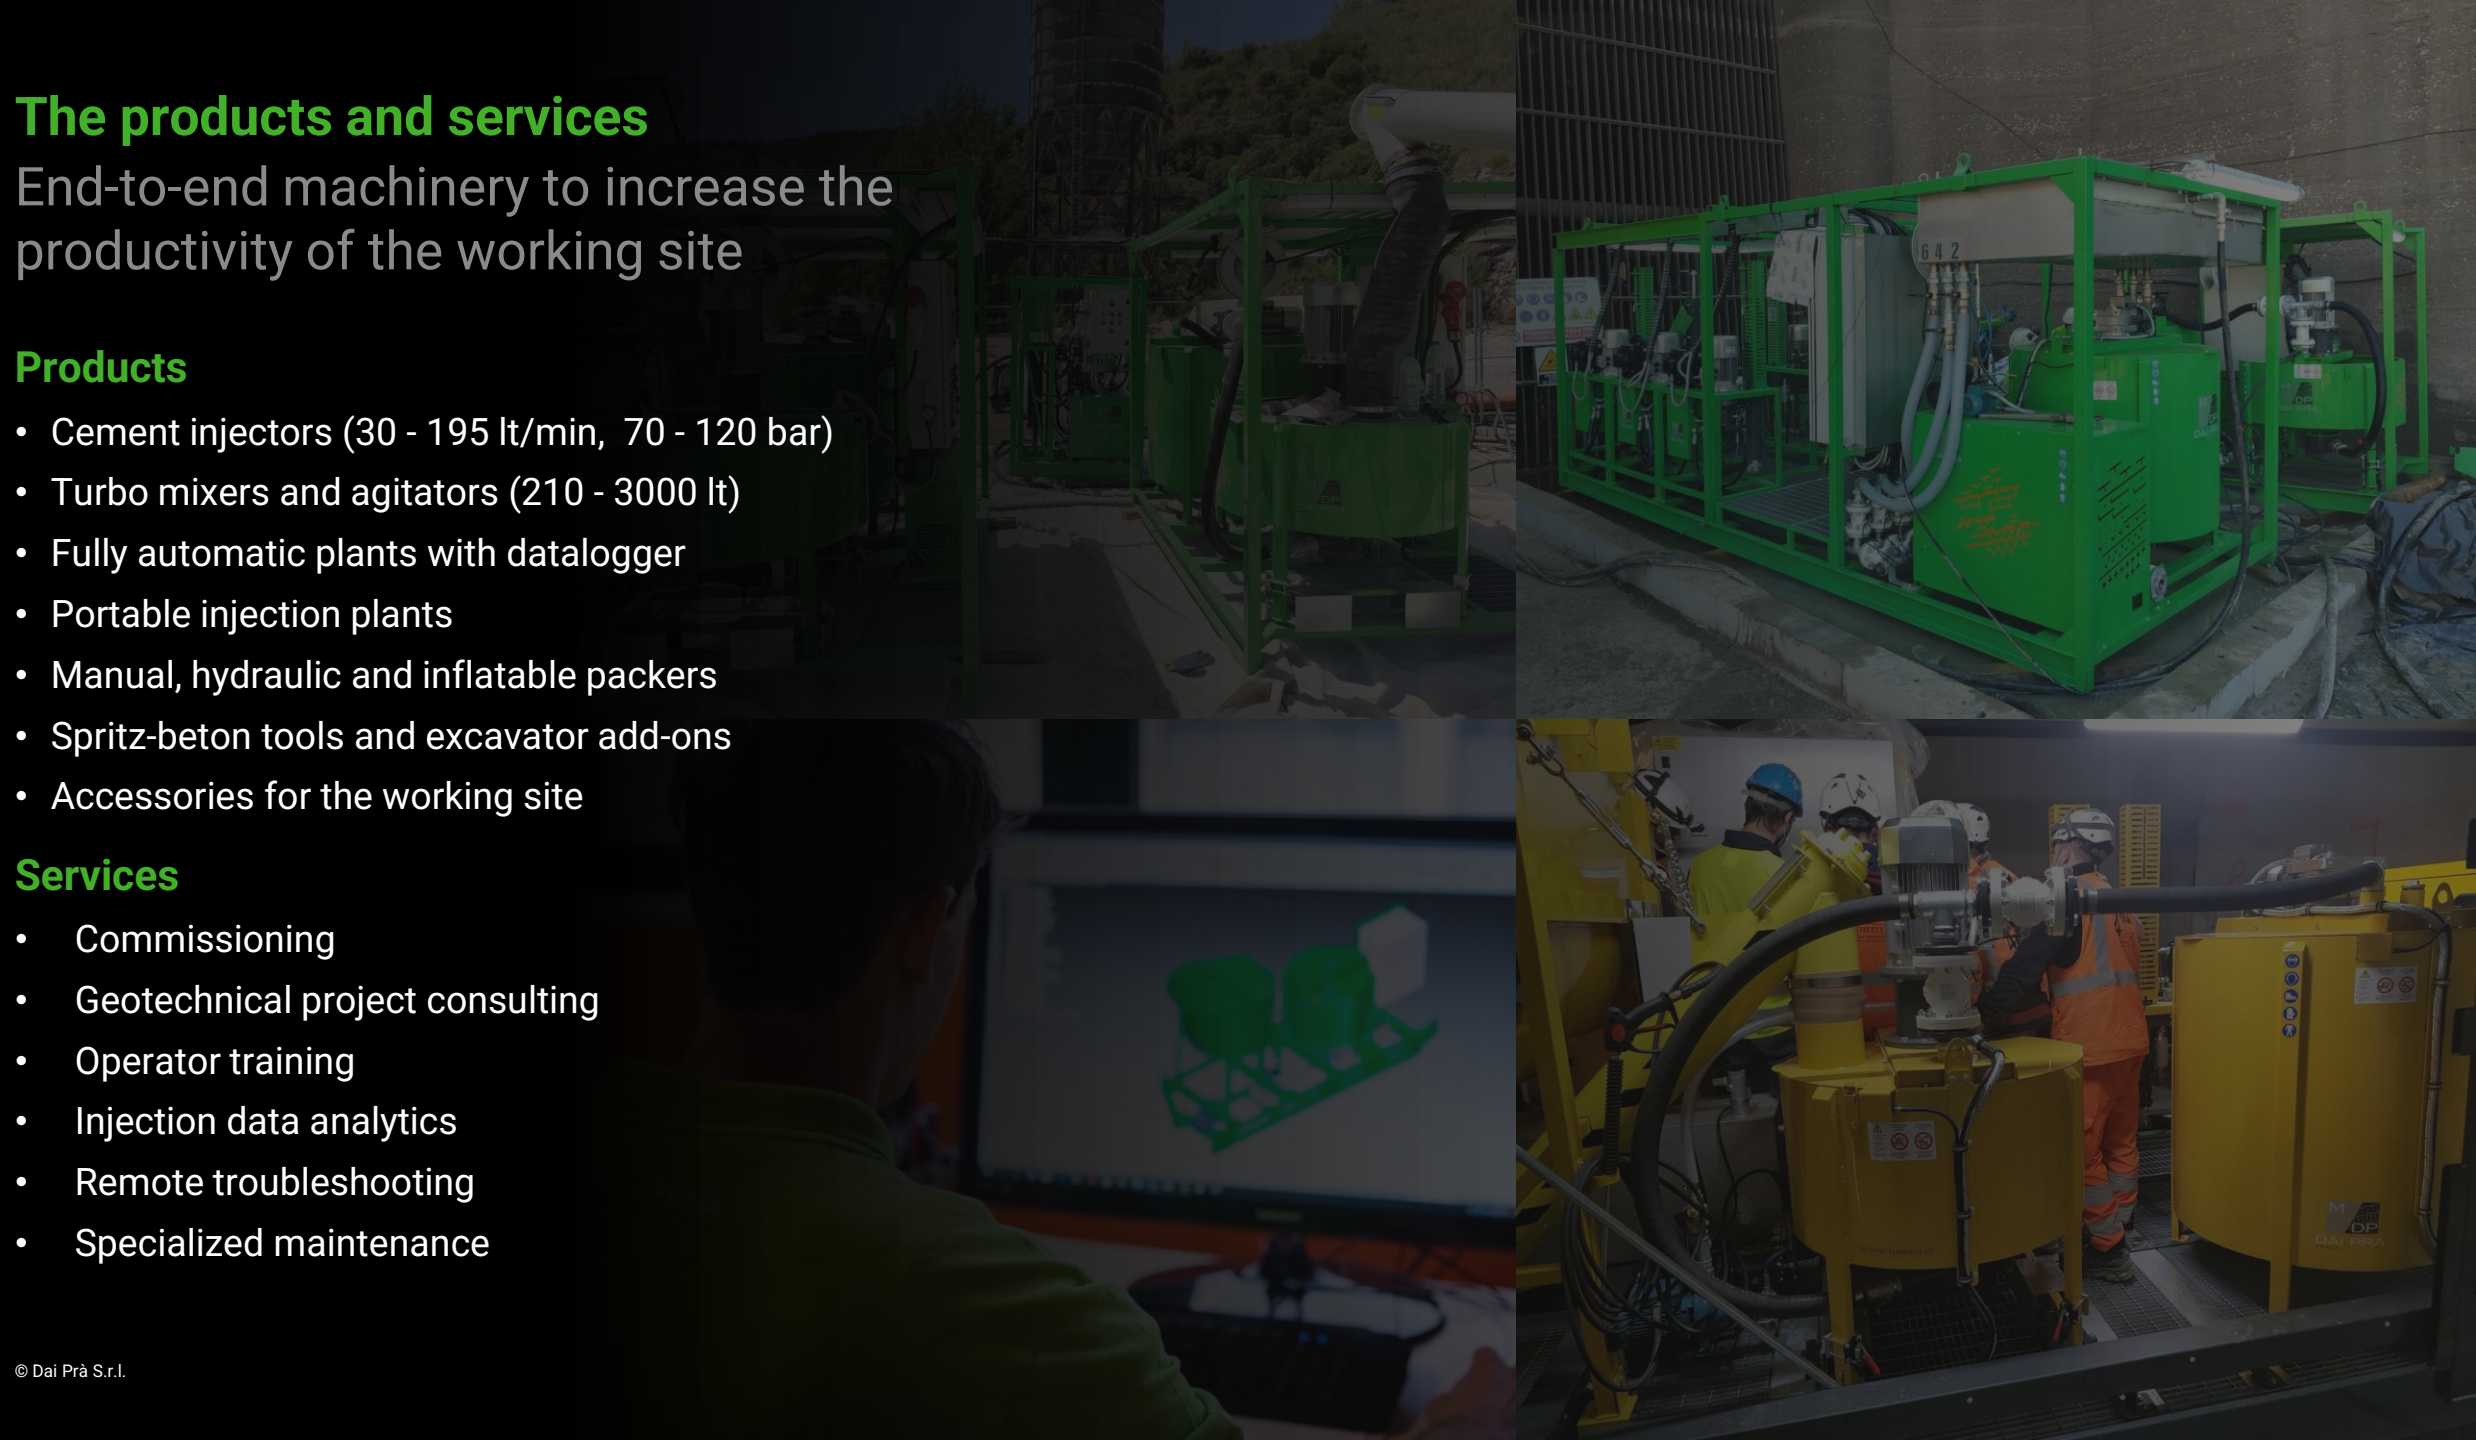

End-to-end machinery to increase the productivity of the working site

Products

- Cement injectors (30 - 195 lt/min, 70 - 120 bar)
- Turbo mixers and agitators (210 - 3000 lt)
- Fully automatic plants with datalogger
- Portable injection plants
- Manual, hydraulic and inflatable packers
- Spritz-beton tools and excavator add-ons
- Accessories for the working site

Services

- Commissioning
- Geotechnical project consulting
- Operator training
- Injection data analytics
- Remote troubleshooting
- Specialized maintenance

Contacts

Contact us or our international distributors

Paola Dai Prà (CEO)

Paola pivoted the foundation business into manufacturing in 1997 and have been leading the international expansion for 20+ years

Guglielmo Martignon (CTO)

Guglielmo re-engineered and developed 20+ machines in Dai Prà portfolio and has filed 2 patents for innovative solutions

Maurizio Rigoni (COO)

Maurizio has 30+ years of experience in working sites management for a top international player in foundations and geotechnical works

Credentials

Some of Dai Prà machines deployed in international projects

High speed road Messina-Catania

1. Double injector and mixing plant with datalogger with Lombardi technique

Scandarello dam

2. Fully automatic mixing and injection plant with datalogger
3. Triple injector plant (DE/OL 80 SP) with datalogger with GIN technique
4. Big bag emptying system for mixer feeding

Cornatel hydraulic gallery waterproofing

5. Fully automatic 6 injectors and mixing plant
6. Injector DE/OL 130 stroke 400
7. 1000 lt mixing and injection plant
